

DLEL-001

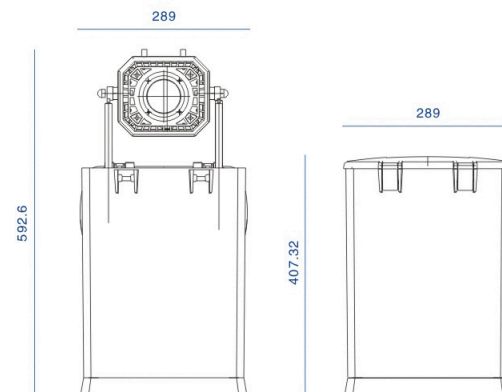

基本性能 Characteristics:

Model (型号)	DLEL-001
Wattage (功率)	12w
Lumen (最大照度)	1320lm
Optic (照射角)	60°/90°/120°
Working Voltage (标称工作电压)	12VDC
Charge Time (充电时间)	4~5/8~10h
Battery (蓄电池类型)	Lead acid/Nicad

Additional function:

1. Can show balance electricity on PCB
2. Sign al board can be turn off after 20 seconds automatically
3. Can charge for Mobile, lap-top computer, TV, etc.

Description

1. A safe waterproof emergency led work light can be used in various application such as Mining, Maritime, Utilities, ect.
2. The emergency led work light is produced by a tough ABS material and cover lens is polycarbonate. The light head made from diecast alum assembly and with battery compartment both fully sealed and rated (IP65). It' s easy to carry and operate, only need to unlock the body clip, then use your hand press the light head, it can be lift with high pressure gas spring, then just push the light button and can work.

Characteristics

1. Battery run time: Above 10 hours with rechargeable battery
2. High pressure gas spring operate light head lift up and down
3. The body is made from an automotive type ABS
4. The lens is made of strong and durable polycarbonate, protect the light source
5. The light head can be adjustable with mounting yoke to swivel from 0~ 90°
6. IP 65 rating, can be operate in wet location
7. Integral charging cable compartment, can charge TV, computer and mobile.
